

## Abstract

Hyperbranched polyesters containing ethylenically unsaturated groups

5

Hyperbranched polyesters containing ethylenically unsaturated groups and obtainable by reacting

(c) at least one compound having at least one ethylenic double bond

10

---

with at least one hyperbranched polyester obtainable by condensing

(a) at least one dicarboxylic acid or derivative thereof with at least one at least trifunctional alcohol

15

or

(b) at least one tricarboxylic or higher polycarboxylic acid or derivative thereof with at least one diol.
